Journey NYC

This isn't just a restaurant; Journey NYC is a sensory experience. This new immersive dining destination in Chelsea features floor-to-ceiling and tabletop 360 projection mapping allowing you to travel the world while you eat. During the five-course prix fixe you'll go from the lush greenery of the rainforest to a fiery volcano to an underwater shipwreck with the dishes matching the taste and aesthetic of each location. This restaurant combines the concept of "dinner and a show" directly onto the shared communal table, taking you around the globe from the comfort of your seat.
